

Installation Guide – Whiz Downlight

Dimensional Drawing :

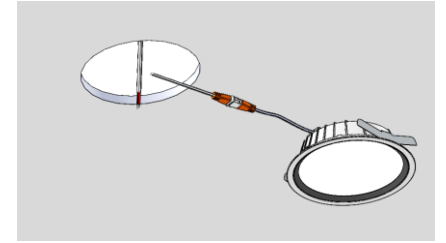

1. Turn off the power : switch off the circuit breaker for the area you'll be working in.

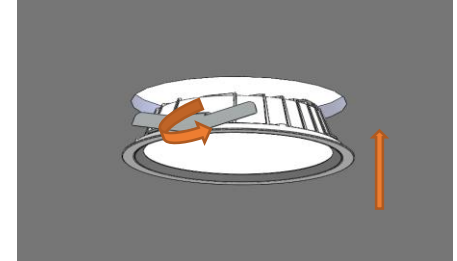

2. Use measuring tape to mark the center points for each light. Attached the appropriate-sized hole saw or drywall cutter to your drill and carefully cut the holes .

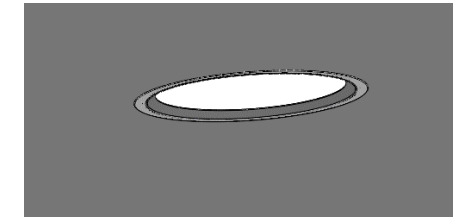

3. Pull the electric cable through the hole .connect the main supply to the luminaire & secure connections with wire connectors and tuck them inside the fixture junction box .

4. Press the mounting clamp & Insert the luminaire into the ceiling hole & secure the luminaire using the provided clamp . Insure it is flush with ceiling and stable .

5. Turn the circuit breaker back on & switch on the lights to test their functionality .

Installation is finished
